Energy Saving LED

T8HP-5FT

High Efficiency 5ft T8 LED Compatible Tube

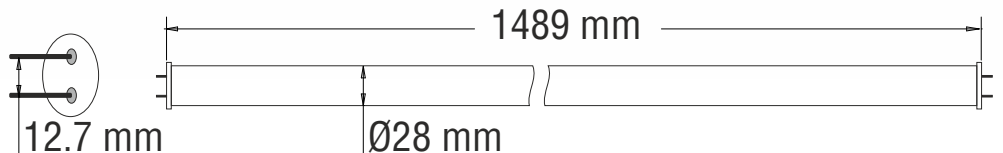

New range of high efficiency LED T8 Tubes, Magnetic ballast compatible, are an easy replacement for traditional fluorescent tube lights. The simple plug-and-play feature of a ballast-compatible LED tube light, (one fitted with a starter) makes them the best alternative to fluorescent tube lights.

LED tubes are energy efficient, environmentally friendly alternatives to standard fluorescent tubes, in that they have no mercury content, run cool and emit no UV light.

Features:

- Specially engineered to be compatible with all magnetic ballasts, eliminating the need for costly and time-consuming rewiring.*
- Direct replacement for standard fluorescent tube.
- Power: 27W
- Lumen Output: 4000lm
- Length: 5ft (1500mm)
- Voltage Range: 220-240VAC
- Epistar SMD LED
- CRI > 80
- Efficiency: 150lm/W
- Non-Dimmable
- 3 year guarantee
- Beam Angle: 330°
- No UV output/Mercury Free
- Energy Saving up to 85%

Dimensions:

Available colours:

- White-3500k
- Cool White-4000k
- Daylight-6500k

*To replace fluorescent tubes with no starter, i.e. HS ballasts, the ballast will need to be cut out and the fitting rewired accordingly.
