Add Manually -wifi device - default mode NO.3.2.1

- proceed to the next step
- to view the instructions

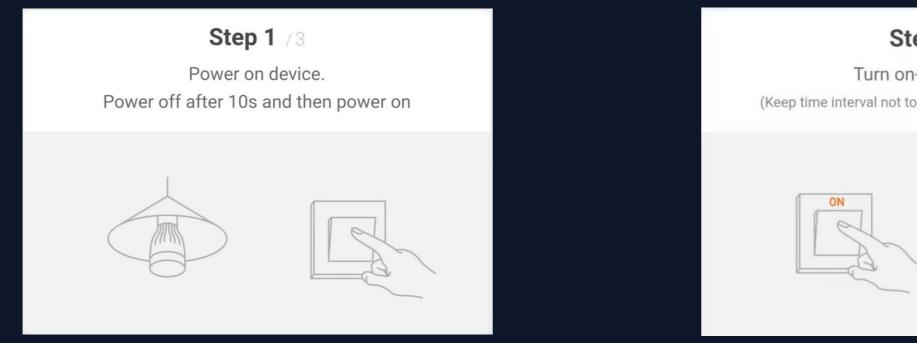

1. The app supports two configurations: Default mode and AP mode. Click "AP Mode" at the top right corner of the "Default mode" page to switch between modes

2. To select "Default mode", please make sure the indicator light on the smart device is flashing rapidly (blinking twice per second) and then click the button to

3. If the indicator light is not flashing rapidly, click "Help"

NO.3.2.1 Add Manually -wifi device - default mode

Notes: How to set indicator light to rapid flashing:

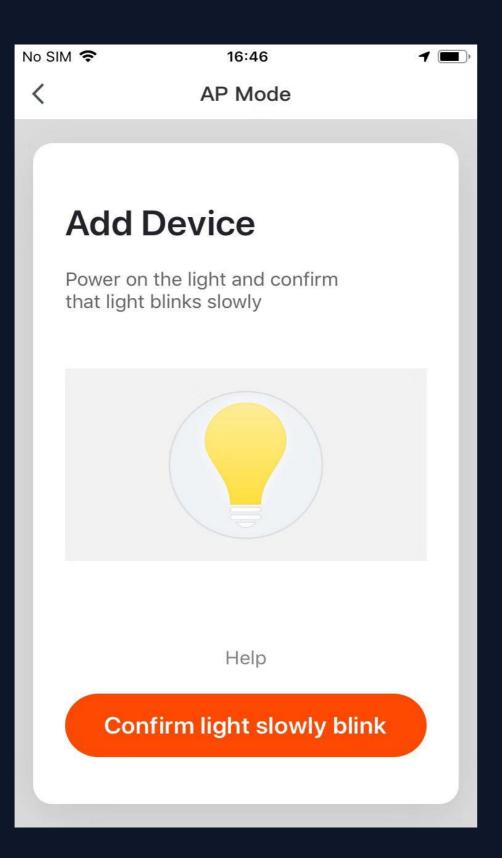

Step 2 /3

Turn on-off-on-off-on

(Keep time interval not too short, turn off after light is on)

Add Manually -wifi device - AP Mode NO.3.2.1

- sure the indicator light on the smart device is flashing slowly and then click the button to proceed to the next step.
- slowly, click "Help" to view the instructions.

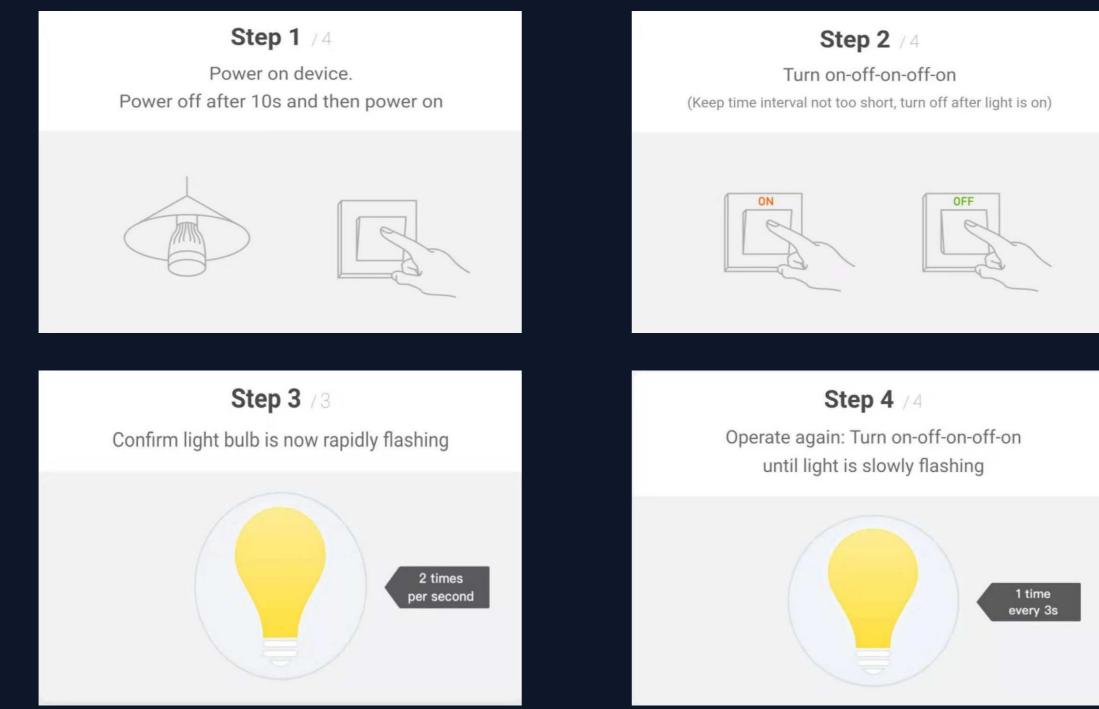

1. To select "AP Mode", please make (blinking once every three seconds)

2. If the indicator light is not flashing

NO.3.2.1

Add Manually -wifi device - AP mode

Notes: How to set indicator light to slow flashing:

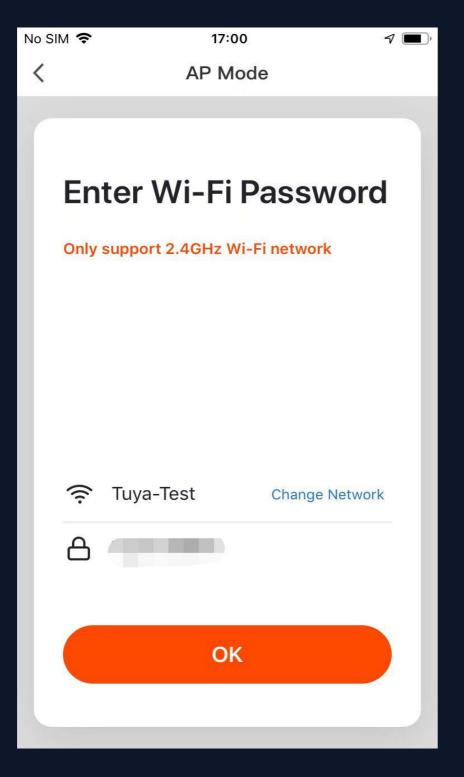

NO.3.2.1 Add Manually -wifi device - Enter wifi password

In a selected mode, clicking confirm button
on the page when the indicator light flashes
rapidly/slowly will bring up the page shown
in Fig. 1.
Select the Wi-Fi in the work area of a device
that can enable successful Internet
connection, enter the Wi-Fi password, and
click "OK" to proceed to configuration.

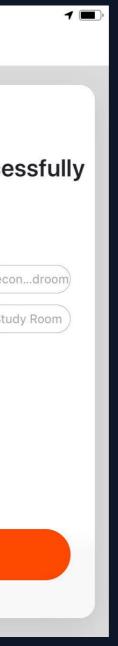

NO.3.2 Add Manually– wifi device-Configuration

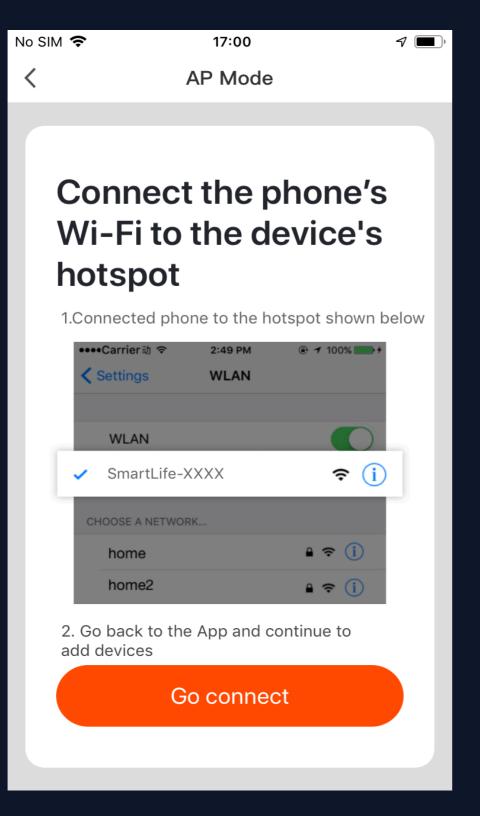

If default mode is selected, app configuration will be completed as shown in Fig. 1. Successful configuration will appear as shown in Fig. 2. Names of devices that have been configured successfully can be changed, and the locations of the rooms where the corresponding devices are can be selected.

¢	Control smart devices	
All d	levices Living Room Bedroom	
Ŧ	TY-CW-vdevo Group	>
Ŧ	TY-CW-vdevo 群组	>
Ŷ	Color Lights	>

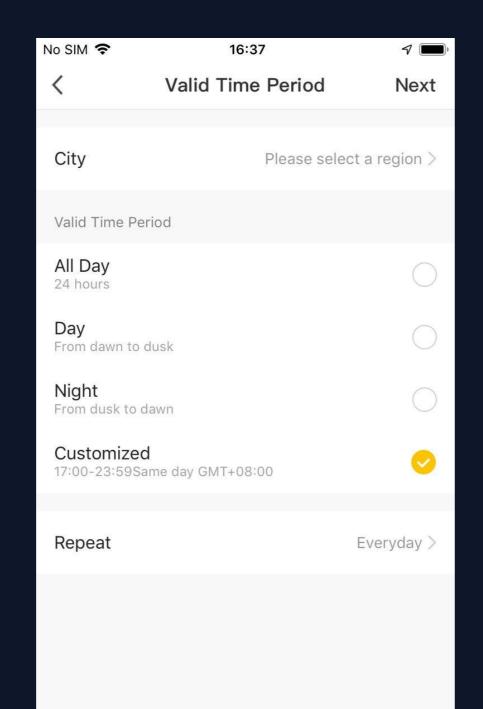

Add action:

Click "Add action" or "+" at the top right corner to open the menu, as shown in Fig. 1. There are four types of actions: execute scene, trigger automation, send a reminder and time-lapse.

NO.5.1 **Smart Features - Automation**

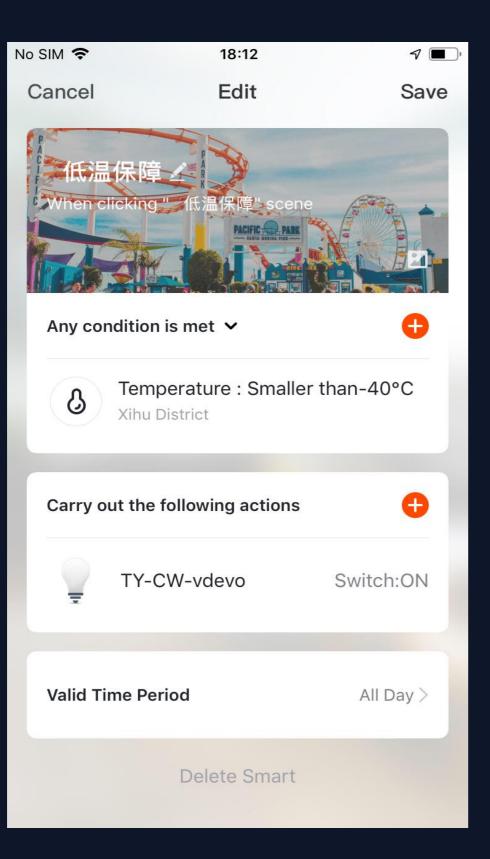

Valid Time Period:

you can set a valid time period for automation. For example, if you define a scene where the nightlight automatically lights up when the human motion sensor detects human presence, you can select "Night" as the valid time period. In this case, the nightlight will not automatically turn on in the daytime.

Smart Features - Automation NO.5.1

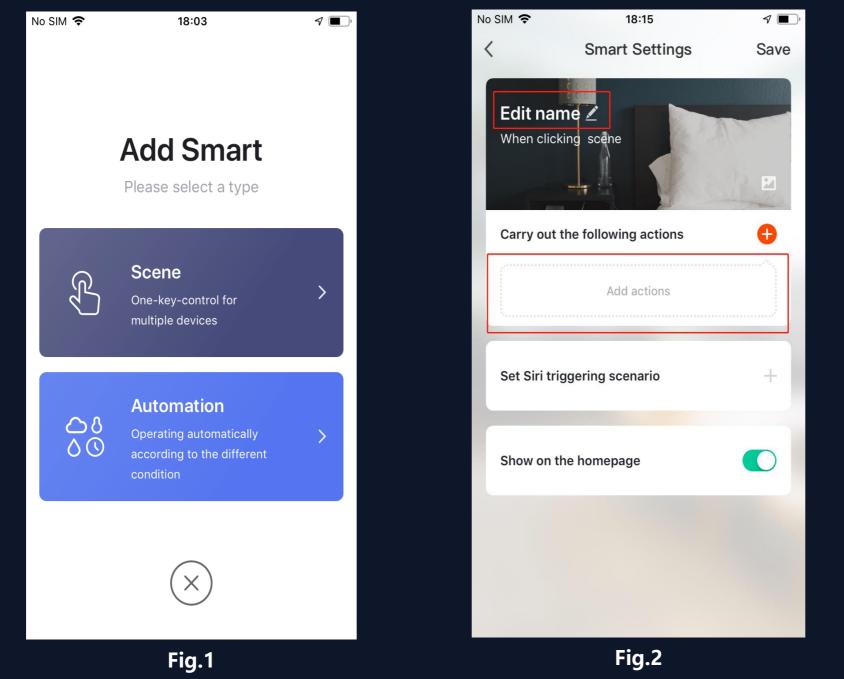

Conditions and actions of automation can all be set up as shown in Fig. 1. The system primarily supports three types of automation:

Inter-device synchronization: such as turning on the aroma diffuser and air purifier automatically at the same time the A/C unit is turned on. 2. External environment and device synchronization: such as turning on the A/C unit automatically when the temperature falls below 0°C. 3. Timed actions: such as drawing back the curtains drawn automatically at 8:00 am every morning. 4. Geo-fencing: You can set arrive or leave a certain place as a condition to perform specific actions.

Smart Features - Scene NO.5.2

In figure 1, select the scene and enter the Settings page. As shown in figure 2, you can edit the scene name. Click "Add actions" or "+" in the top right corner to add the execution action. The action menu is shown in Fig. 3. Configuration is similar to that of automated devices. In addition, you can use siri to trigger the scene.

	开关-vdevo	>
	Fig.3	

NO.5.2 **Smart Features - Scene**

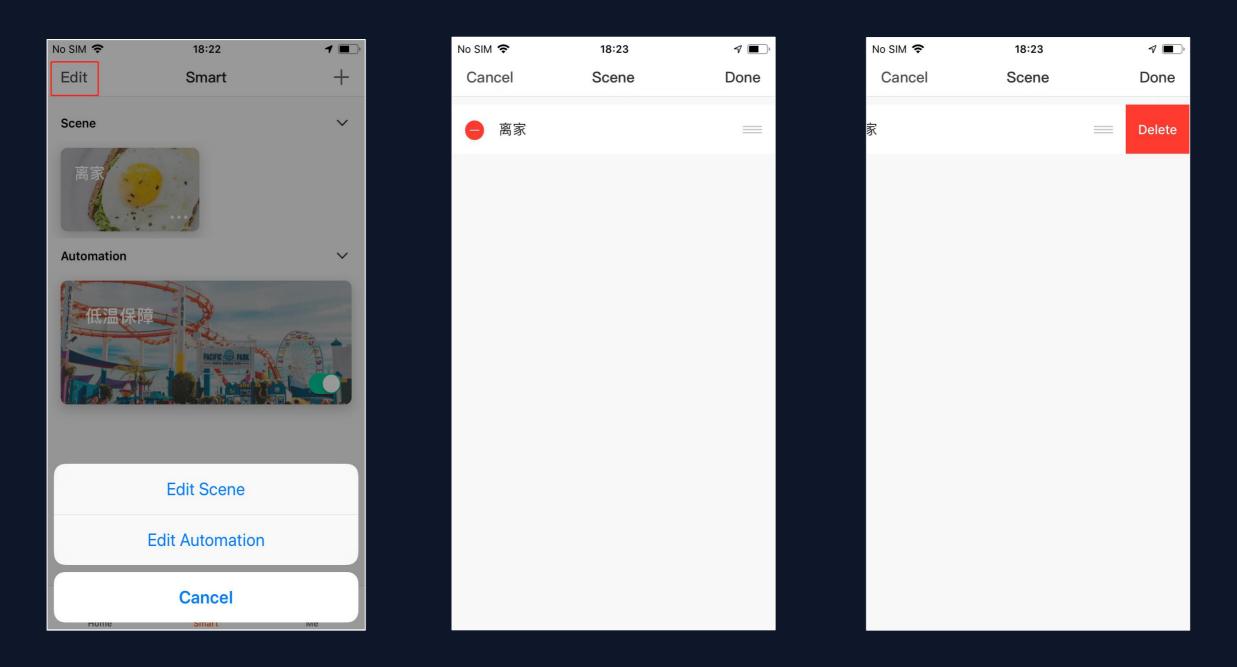

To configure a scene with "Trigger automation", you must set up an automated scene in advance. If existing automation options are available as shown in Fig. 1, select "Enabled after triggering" or "Disable after triggering". Then, click "Next" and enter scene name, and click "Save" at the top right corner to finish configuration.

Smart - add/modify/delete NO.5.3

Previously configured automation and scenes are displayed in the "Intelligent" page. Click "Edit Automation" at the top left corner to modify existing scenarios and automated devices. For example, click "Update Scene" to go to the page shown in Fig. 2, where the order of scenes can be changed and can be deleted by sliding left. (In iOS, click "-" on the left of scenario name to delete.)

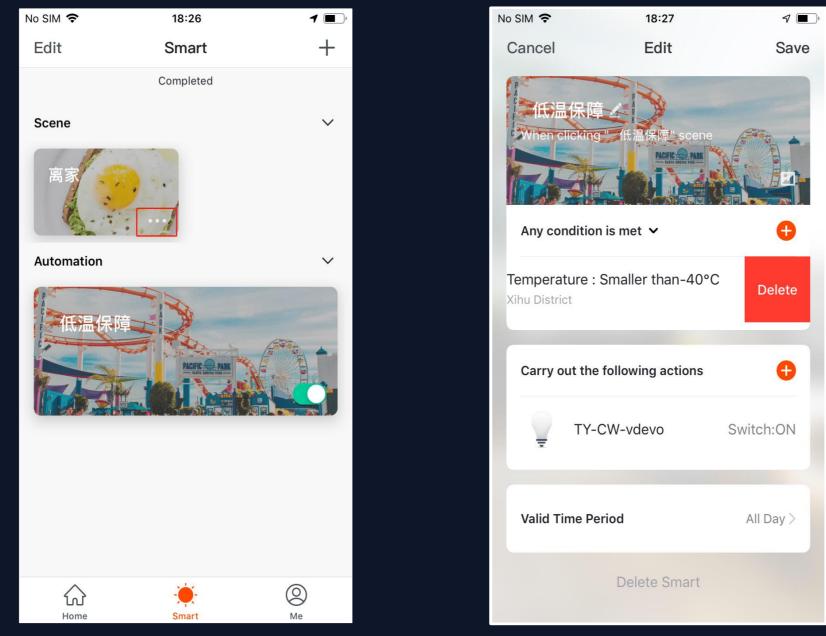

NO.5.3 **Smart - add/modify/delete**

Edit a scene: Click "..." as shown in Fig. 1 to go to the Edit page. Edit automation: Click anywhere on the background of automation, as shown in Fig. 1, to go to the Edit page. Go to the automation edit page shown in Fig. 2. Slide left to delete previously added conditions or actions, add new conditions or actions, or delete the smart feature entirely.

3. How echo	to control smart devices with ?	>

Submit Fault: submit your feedback here on problems encountered during usage

problem for you faster. The diagnosis time is about 2 minutes

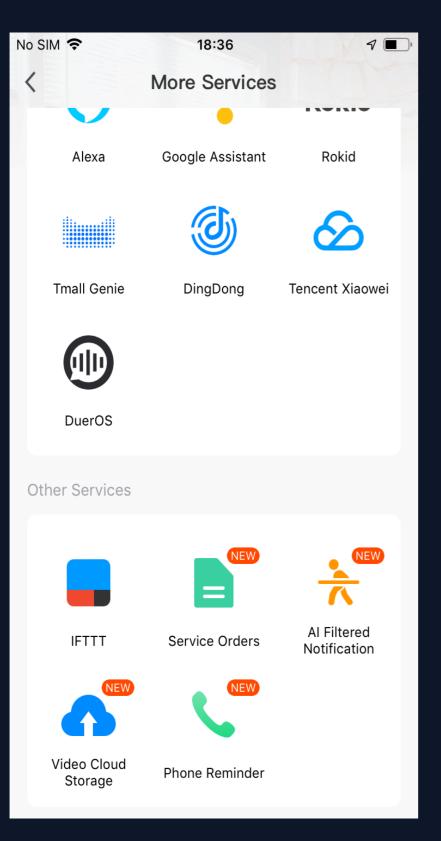

Suggestion: you can submit your optimization suggestions for the App here

FAQs: contains three types of frequently asked control

- My Feedback: check the processing results of feedback
- Network diagnosis: network diagnosis helps us solve the
- questions : device networking, App use and third-party

NO.7 "Me" — More Services

1. Voice Services: you can click on the corresponding speaker icon to see how to connect to it.

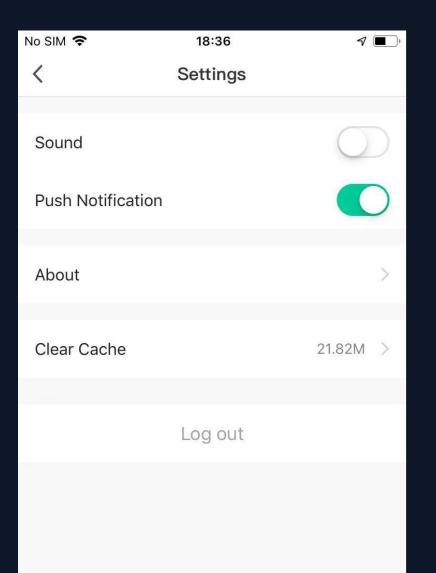

2. Other Services:

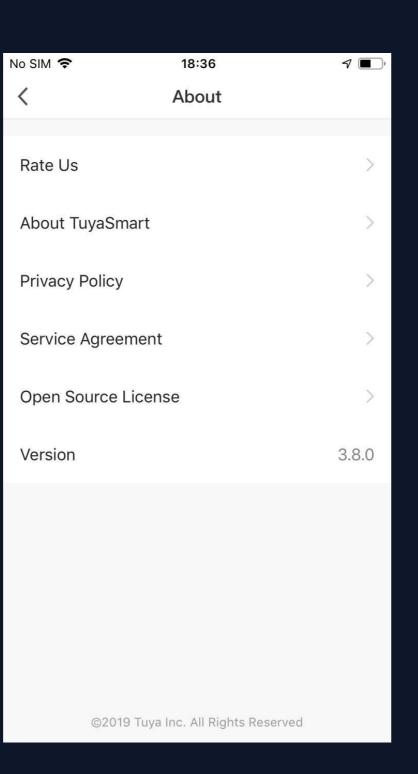

(1) IFTTT: how to connect with IFTTT;
(2) Service Orders: you can check the services you have purchased here.;
(3) AI Filtered Notification: Once the service is activated, notifications will be filtered by cloud based algorithm before you ever receive them.
(4) Video Cloud Storage: Once the service is activated, the device can encrypt and upload the video data to the server, and the user can view the historical video in the App.

(5) Phone Reminder: Once the service is activated, when the user-defined scene is triggered, the system will automatically notify the phone numbers on the file(more than one number can be called each time) to better protect you and your family.

account.

You can modify the profile photo, nickname, temperature unit and time

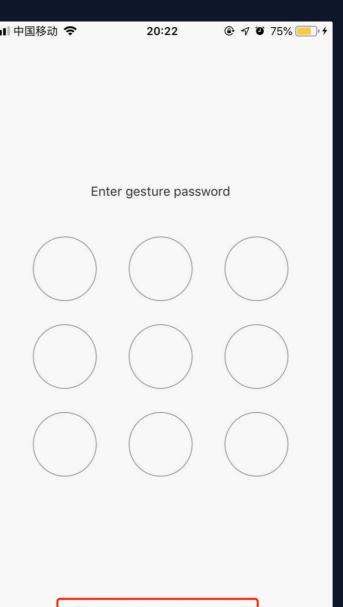

Go to the "Accounts Security" page, you can modify login password, set the gesture password, and deactivate the

NO.7 Personal-Modify Login Password

Click "Gesture unlock" to set up a gesture password. Once a gesture password is activated, you will have to use the gesture to access the app. If you forgot your gesture password, click "Forgot the gesture password" to have an authentication code sent to your registered mobile phone number or your email. Enter the code and set up a new gesture password to continue.
