

# Solar

## LED Garden Light

**FESL5R**

**5W LED**

Our new Solar technology has allowed us to develop this range with a higher light output and a more efficient way of changing the light, even in shady or cloudy areas.

The lights have an impressive 5 Watt output punching out 400+/- lumens (comparable to many GU10 lamps). The colour can also be changed with a simple switch on the remote control (included) from warm white to cool white to daylight creating the kind of ambiance you wish.

Being self powered, utilising the daylight to recharge its battery, these fittings need no wiring, no mains power and cost zero to run. It comes complete with an easy to use remote.
